

PACKAGE TRACKING

The latest estimates indicate that cargo theft now exceeds **\$60 billion in losses annually**. Just one shipment loss can cost millions of dollars. Does this sound painfully familiar to you?

Other theft related costs include increased insurance premiums, weakened customer confidence, diminished product value due to black market resale and more. In short, **cargo theft's impact on your company's bottom line cannot be ignored.**

At GPSit **we believe secure transportation for your goods in transit should be easy and cost effective.** We can help you achieve this with GPS based package tracking.

BENEFITS SUMMARY:

- ✓ Improved supply chain security
- ✓ Achieve compliance requirements
- ✓ Reduce labor costs and human error
- ✓ Reduce loss and damage of goods
- ✓ Aid law enforcement with recovery

Package tracking involves **covertly incorporating small, battery operated Assisted GPS (aGPS) tracking devices into your shipments**, giving you a proven means to both track and help facilitate recovery if the merchandise is lost or stolen. Our web based TrackFusion application enables easy access from virtually any device, **providing real time visibility of your shipment location** and condition.

GETTING STARTED IS EASY!

- Trackers that are easy to deploy and retrieve
