

# TRAILER TRACKING

**Is it tough managing your trailer inventory?** Is your supply chain suffering? Are you frustrated with poor trailer utilization, theft and ongoing customer service challenges?

At GPSit we believe **managing your remote trailer inventories should be easy and cost effective.** We help you address these challenges with GPS based trailer tracking.

Incorporating wireless GPS based trailer management into your **strategy delivers competitive advantage** to trailer owners, leasing companies, logistics service providers and virtually all transportation chain stakeholders .

## BENEFITS SUMMARY:

- ✓ Improved trailer utilization
- ✓ More efficient yard and fleet operations
- ✓ Increased number of loads per trailer
- ✓ More timely and accurate billing
- ✓ Reduction in theft associated costs
- ✓ Improved customer service
- ✓ Improved return on trailer assets

Trailer tracking **utilizes rugged, long battery life GPS trackers** that provide on demand location information via wireless networks. Our web based TrackFusion application **enables easy access from virtually any device**, providing real time visibility of your trailers location, status and usage history.
